

Transform Your JD Edwards ERP System into a **Business Enabler**

Get More Value

CSS Managed Services provides strategic value so you get more out of your JDE system to support streamlined business processes, making your entire organization more efficient. Our consulting experts serve as an extension of your team that drives competitive advantage through improved business process, industry best practices, and Oracle expertise.

CSS Managed Services reduces ERP support costs and turnaround time through functional design & configuration, programming & development, testing, and training, as well as day-to-day CNC & sysadmin support.

Resources When You Need Them

We provide experienced & talented consulting resources covering all major JDE applications and technical areas. Your functional and technical team members are flexible, rapid, responsive, multi-threaded, and all have backup personnel. Our 24x7 System Monitoring and Emergency CNC Response options reduce your downtime.
