

# The Roadmap for CTB's Transformational Cloud Migration

CTB has relied on the JD Edwards World software suite since 1997 to manage financial, procurement, inventory, payroll, manufacturing configuration, and more. But as the company has grown, its technology have outpaced the capabilities of its current software.

## AT A GLANCE

Understanding JDE solutions and how they map to the Oracle Cloud

Analyses of opportunities, financial impacts, and areas of business value

A defined future state of CTB's cloud solutions

A timeline for successful implementation that delivers value from the start

Growth often raises new challenges—and that's been the case with CTB. Amidst heavy use of JDE solutions, the company experienced outages. And keeping up with updates as well as finding employees with JDE skillsets proved difficult.

"It makes us reactive, instead of proactive," says Jennifer Leatherman, CTB's IT Business Solutions Director.

## Why JDE Experience Matters

Thanks to ArganoCSS's processes and strategy, the CTB team now has a better understanding of all the benefits of moving to the Oracle Cloud, as well as how to get there. In-depth experience with JDE solutions enabled ArganoCSS to map CTB's current software footprint to Oracle Cloud solutions.

The results illuminated areas for application consolidation and new opportunities for business process automation. Additional analyses also determined the financial impact and business value of the migration.

## A Cloud Conversion Game Plan

CTB now knows exactly what's required to make a successful transition to the cloud. ArganoCSS provided the company with a future state design of its technology stack, showing the Oracle Cloud solutions CTB will deploy for each business function. ArganoCSS also created an implementation timeline and plan to ensure CTB realizes the business value of Oracle Cloud solutions throughout the process.

“ ArganoCSS had such a strong understanding of JDE and they really understood where we were coming from. They were able to help align us with the right Oracle solution—it was a very good process for us.

JENNIFER LEATHERMAN, *CTB IT BUSINESS SOLUTIONS DIRECTOR*

## About ArganoCSS

ArganoCSS offers implementation and integration consulting as well as managed services for the full range of Oracle Cloud and on-premise ERP solutions. Whether you want an on-premise upgrade, want to add Cloud to your existing footprint or are considering a full transformational upgrade to Cloud, you can rest easy knowing we've got you covered. Pick your path and we'll get you started.
